

## Tetanus, Diphtheria and Pertussis Vaccination

Documentation of a primary series or adult catch-up series is required. If this has already been provided, do not resubmit the primary series.

All students must have a dose of pertussis-containing vaccine in adulthood prior to beginning the OB/Peds placement, unless it has been <2 years since the adolescent dose.

Students must provide proof of tetanus and diphtheria-containing vaccine received within the last 10 years.
