

Tuberculin Skin Test Form

If a 2-step Tuberculin Skin Test (TST) was completed previously, and documentation has already been provided, a single-step TST should be completed annually.

Students with a documented contraindication to a TST do not need to have a repeat TST. Please refer to immunization guidelines for steps to follow if you had a previous positive test or active or latent TB.

Please ensure you are a minimum of 4 weeks after Covid-19 vaccine prior to completing TST. If you have not had the Covid-19 vaccine please complete TST first if possible

1-Step TST Annually	
Date (yyyy/mm/dd) given:	HCP Initials:
Date (yyyy/mm/dd) read:	HCP Initials:
_____mm duration	
Interpretation according to Canadian TB Standards:
